BIG INSTANCE TECHNOLOGIES

Our Services

- Application Modernization
- Web Development
- Mobile Application Development
- Cloud Engineering

- Service Automation
- Cloud Hosting and Migration
- IoT Solutions
- Salesforce CRM Solutions

- Fully Managed Solutions
- Project / Program Management
- Consultancy Services
- Staff Augmentation

We design, modernize, build, implement, and manage digital technologies to help transform your business by leveraging our unparalleled expertise in Software Development, IoT, AI, Infrastructure, and Application Management.

Our Strengths

- Comprehensive, innovative, and practical solutions to your requirements

- Demonstrated capabilities in delivering scalable, secure, and robust architecture

- Technology advisory to determine your needs and articulate the best solution.

- Total solution – from understanding requirements, risk-free execution, and ongoing support.

- On-prem or cloud solution as per customer requirement.

- Expertise in all leading cloud platforms – AWS, Azure, GCP.

- Track record of successful delivery of a variety of projects.

- Flexible engagement models – time and material, fixed cost, and dedicated resources.

ISO 27001 CERTIFIED

SOC 2 COMPLIANT

- **IoT Solutions:** IoT solutions tailored to the needs of a wide range of industries, delivering unparalleled productivity, high uptimes, predictive maintenance and cost optimization.

- **Salesforce CRM Solutions:** Implementation, customization, and integration, tailoring the platform to your unique needs.

- **Fully Managed Solutions:** Managing and supporting your infrastructure and applications enabling you to focus on your core business.

- **Project / Program Management:** Best practices to ensure successful delivery of critical projects. Leveraging our experience in working with distributed client/vendor teams, using the right management methodology for the project (Agile Scrum / Kanban, CI/CD, DevOps, JAD, Hybrid).

- **Consultancy Services:** Strategy development, technology architect, vendor (selection, negotiations, management), risk management, business analyst.

- **Staff Augmentation:** Provision of experienced personnel tailored to the client's requirements, working under the client's direction.

- **Application Modernization:** Transform legacy applications into robust, scalable, and high-availability applications leveraging microservices architecture that is conducive to cloud environments.

- **Web Development:** Cutting-edge web applications to empower businesses with responsive, and scalable solutions that deliver exceptional user experiences.

- **Mobile Application Development:** Ideas transformed into stunning mobile experiences, encompassing cross-platform, Web, iOS, and Android solutions.

- **Cloud Engineering:** Scalable & portable robust cloud solutions, leveraging application containerization, and rapid development cycle using automation tools and CI/CD pipelines.

- **Service Automation:** Streamline day-to-day operations, allowing you to boost productivity, reduce operational costs, and focus on what truly matters, leveraging IoT and AI.

- **Cloud Hosting and Migration:** Take advantage of modern cloud solutions by migrating workloads to the cloud of your choice (AWS, GCP, Azure) with minimal disruption to operations.
